Digital Marketing

Digital marketing is the act of promoting and selling products and services by leveraging online marketing tactics such as social media marketing, search marketing, and email marketing.

SEARCH ENGINE OPTIMIZATION (SEO)

Search engine optimization (SEO) is the art and science of getting pages to rank higher in search engines such as Google. Because search is one of the main ways in which people discover content online, ranking higher in search engines can lead to an increase in traffic to a website.

GOOGLE ADWORDS

Google AdWords is one of the services advertisers use for online promotion of their content, brand, website, etc through certain defined keywords to achieve traffic or leads.

SOCIAL MEDIA OPTIMIZATION (SMO)

Social media optimization (SMO) is the use of social media networks to manage and grow an organization's message and online presence.

E-MAIL MARKETING

Email marketing is a direct marketing channel that lets businesses share new products, sales, and updates with customers on their contact list. Its high ROI makes it crucial to most businesses' overall inbound strategy.

SOCIAL ENGINE MARKETING

Social media marketing (SMM) (also known as digital marketing and e-marketing) is the use of social media—the platforms on which users build social networks and share information—to build a company's brand, increase sales, and drive website traffic.

WEBSITE DESIGN

As you can see, websites serve many purposes and use different formats to fulfill their purpose of giving competitive advantages to organizations or individuals that "hang" on the network.
